

**Subject: LINK GLASS FABRIC TAPE 0,12\_ Information sheet in compliance with Regulation (EC) REACH N. 1907/2006**

Dear Customer,  
the European Regulation (EU) on Chemical Substances No. 1907/2006 (REACH), which came into force on 1° June 2007, prescribes a Safety Data Sheet (SDS) only for dangerous substances and preparations.

Moreover in the Art. 3 of the REACH Regulation, an article is defined as an object to which a particular shape, surface or design is given during production that determines its function to a greater extent than its chemical composition.

Therefore, for the reasons stated above, our **LINK GLASS FABRIC TAPE 0.12** product is considered an "article" pursuant to the REACH Regulation, and also:

- A) does not contain substances listed in the REACH Regulation as subject to the restrictions set out in Annex XVII
- B) does not contain substances on the candidate list of REACH regulation
- C) does not contain substances required by Annex XIV to the REACH Regulation

There is therefore no legal obligation to issue a Safety Data Sheet, pursuant to Art. 31-paragraph 1 of the REACH Regulation.

However, as suppliers of this product, we guarantee the safety of its handling through the Instructions for Safe Use (SUIS) for all the products that compose it.
